

Australian Innovation

Watch Armour is proudly developed by an Australian-owned security company, bringing together technology and human-centred safety solutions. Whether in healthcare, retail, banking, or hospitality, it's designed to protect the people who protect your business.

Why Watch Armour?

Watch Armour looks and feels like a regular smartwatch, but it's built with safety at its core. With a discreet design, staff can trigger an alert without drawing attention, notifying both their co-workers and the monitoring centre in real time.

- Instant, discreet alarms
- Group-wide notifications
- Monitoring centre support with GPS data
- Fits seamlessly into OH&S and customer safety plans

Key Features

Watch Armour combines the familiarity of a smartwatch with discreet alarm capabilities.

When triggered, it instantly alerts the entire workgroup while sending location data to the monitoring centre for fast response.

- ✓ Silent SOS – discreetly triggered alerts
- ✓ GPS Tracking – location shared only when alarms are active
- ✓ Listen-In Function – monitoring centre can discreetly confirm events
- ✓ Audio Transmission – 30-second recording stored securely
- ✓ Reliable Connectivity – private Wi-Fi with 4G backup
- ✓ Unisex Design – discreet, comfortable, and workplace-ready

How It Works

Activating Watch Armour is simple. A discreet tap on the watch face raises an alert, notifying co-workers and the monitoring centre instantly. At the same time, GPS coordinates are transmitted so help knows exactly where to respond.

Step 1: Activate – discreet tap triggers alert

Step 2: Notify – co-workers & monitoring receive alarm instantly

Step 3: Locate – GPS pinpoints staff in need

Step 4: Respond – support dispatched without delay

“
**Safety shouldn't be complicated –
Watch Armour makes it simple.**

At a Glance

More than just a smartwatch, Watch Armour is a complete duress protection solution tailored for frontline teams. With discreet alerts, reliable connectivity, and integrated monitoring support, it gives both staff and management peace of mind.

Looks like a smartwatch, works like a duress alarm

Designed for high-risk workplaces

Combines safety, discretion, & reliability

Helps protect the people who protect your business
