Built for Every Health Environment

Aged Care: Continuous monitoring and peace of mind for carers and families.

Hospitals & Clinics: Live data access for improved patient care and faster decisions.

Medical Research: Reliable data collection for clinical trials and longitudinal studies.

Corporate Health: Scalable wellness monitoring across teams.

Everyday Wellbeing: Personal insights for proactive self-care.

Rehabilitation & Recovery: Track vital signs and progress remotely to support patients between clinical visits.

Remote & Home Care: Enable clinicians and caregivers to monitor health data securely from any location.

Health Technology Providers: Integrate WatchGuardian Health's secure data streams into connected care solutions or analytics systems.

Now in Beta

WatchGuardian Health is shaping the next era of digital healthcare.

Developed by Connectified, it transforms Samsung wearables into intelligent, independent health monitoring tools designed for clinical care, research, and everyday wellbeing.

Currently in beta testing, WatchGuardian Health is inviting partners and innovators to explore how independent, real-time health data can enhance patient outcomes, research accuracy, and overall care efficiency.

Partner with Connectified to explore pilot programs, proof-of-concept opportunities, and enterprise integrations that will redefine connected health.

THE FUTURE OF HEALTH

Independent, secure, and always connected — WatchGuardian Health delivers live insights from Samsung wearables for smarter, seamless care.

CONNECTIFIED

WATCH Guardian HEALTH

Empower Smarter Care with WatchGuardian Health

Developed by Connectified, WatchGuardian Health transforms Samsung Galaxy wearables into powerful, independent health monitoring tools. Designed for clinical care, aged care, medical research, and everyday wellbeing, it delivers live and historical health data directly from the watch—no phone required.

Built on Samsung Knox, WatchGuardian Health provides enterprise-grade security and data integrity for every user, from individual wearers to large-scale healthcare networks.

By turning advanced sensors into actionable insights, the platform helps professionals monitor patients remotely, conduct clinical studies with real-time accuracy, and empower users to take charge of their health with confidence.

Key Features

Independent Operation

Works without a mobile phone. Capture and review data directly through the web-based WatchGuardian platform.

Live Data Capture

Track ECG, heart rate, blood oxygen, body composition, and skin temperature — all in real time.

Smart Reporting

Automate data collection, store historical records, and export results for clinical or research use.

Enterprise Security

Protected by Samsung Knox, ensuring every transmission and record meets enterprise-grade security standards.

Scalable Platform

Manage multiple users, watches, and devices from a single dashboard — designed for individuals and organisations alike.

Core Capabilities

- **Instant Insights**
  Access ECG, heart rate, blood oxygen, and more in real time — giving healthcare teams and users clarity when it matters most.

- **Independent & Secure**
  Fully functional without a paired phone, safeguarded by Samsung Knox for privacy and reliability.

- **Smart Reporting**
  Generate detailed, time-stamped reports with automated scheduling and export capabilities.

- **Versatile Applications**
  From hospitals and aged care to research institutions and wellness programs, WatchGuardian Health adapts to your needs.
